

D&R CobraNet™ Manager

Communicating with the stars

This D&R software tool 'the CobraNet™ Manager' provides the user with an easy to understand overview of the audio network.

The virtual behaviour of the audio network is now made visible by a real-time display of all present connections like in a matrix. From one single location you can manage your network and even schedule your connections and/or (audio)device settings.

From now on building and maintaining your CobraNet™ audio network is one mouse click away.

Cobranet™ Manager plug-in view

CobraNet™ devices can be remotely managed by using SNMP (Simple Network Management Protocol). Products of the CobraNet™ family may have their own SNMP MIB (Management Information Block) that gives you the possibility to control their devices from remote locations.

To get rid of the technical SNMP stuff the CobraNet™ Manager can load "Plug-Ins" for the connected devices.

When the SNMP MIB of a device is available we are able to create a plug-in for the device. When there is no plug-in available for your device you can of course request us for a new plug-in.

The audio network and connected devices make it possible for the user to have a lot of different settings/configurations. In the CobraNet™ Manager the user can define macros of his/her settings, so you can load a special setting with one push of a button (for example in combination with the D&R MCU). The user maybe need to load configurations and make/delete connections in the future, this is simply done by using the onboard scheduler (even repetitive).

Start Date	Start Time	Name	MAC	IP	OID	Data type	Data	Comments
5/16/04	9:45:00 AM	Lyra 2x4 Fader	00:60:28:02:83:46	10.100.100.27	1.3.6.1.4.1.2680.1.1.6.1.1.2.3	Integer	Free bundle	Create Connection for Church
5/16/04	12:30:00 PM	Lyra 2x4 Fader	00:60:28:02:83:46	10.100.100.27	1.3.6.1.4.1.2680.1.1.7.1.1.2.3	Integer	Delete Connection	Remove Connection for Church
5/20/04	2:00:00 PM	Lyra 4 Fader	00:60:28:02:85:72	10.100.100.25	1.3.6.1.4.1.2680.1.1.7.1.1.2.3	Integer	Delete Connection	
5/21/04	3:16:01 PM	NM 84	00:60:28:02:83:D6	10.100.100.26	1.3.6.1.4.1.2680.1.3.10.1.1.1	Integer	510	Open MIC1 at Studio A
